

SELF-SUPPORTING WATER **FIT'S**
POOL

Water biking without a swimming pool

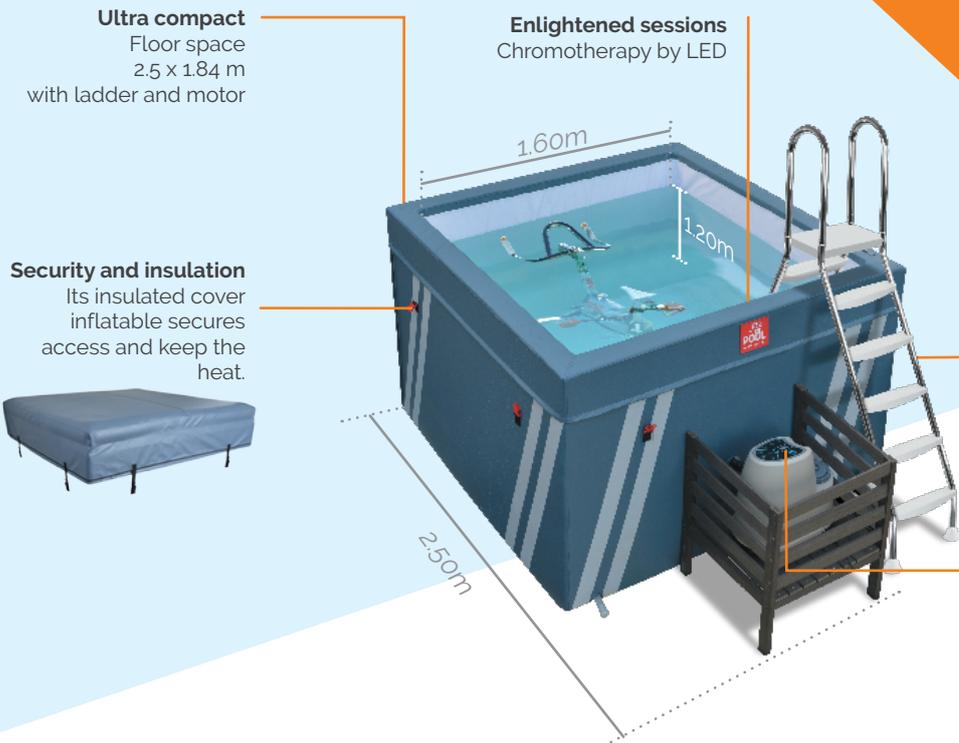

The Fit's Pool is an innovative self-supporting pool that can be easily dismantled, since it combines the simplicity of a spa installation with an item of water fitness equipment: a water bike (included).

The Fit's Pool is a **complete fitness pool**. It allows those who do not have a pool to discover the pleasure of aquafitness. Its **modular structure** made of high-density insulating foam side panels gives it **exceptional rigidity**.

GENUINE PERSONAL SPA BATH CENTRE :

It included a **complete filtration and water heating system**. This is **the first aboveground pool** with a water height of 1.20m (minimum height recommended for the practice of aquabike).

YOUR HAPPYBIKE INCLUDED
